PROFESSIONAL SUMMARY

Computer Systems Engineering graduate with a strong foundation in software development. Passionate about applying technical skills in real-world projects and continuously learning modern technologies, and delivering high-quality solutions that support both team and organizational goals.

TECHNICAL SKILLS

- Programming Languages: Java, Python, C++
- Web Technologies: HTML, CSS, JavaScript
- Frameworks & Tools: .NET Core 8, ASP.NET Core MVC, React, Flutter, Oracle APEX
- Databases: MySQL
- IDEs & Tools: Visual Studio Code, Visual Studio, Apache NetBeans
- Development Areas: Front-End Web Development, Back-End Web Development

PROJECTS

Engineering Navigator – Smart Campus Assistance System
Graduation Capstone Project | Unity Developer

- Developed a 3D indoor campus navigation system using Unity.
- Implemented AI-based voice interaction for navigation and student inquiries.
- Designed character movement and collision handling inside campus buildings.
- Integrated cloud-based academic resources using Firebase and QR codes.

***Technologies*:** Unity 3D, Flutter, Firebase, Appwrite, AutoCAD, AI Voice APIs.

EXPERIENCE

HexaSol – AI & Web Development Intern | Sep 2024 – Jan 2025

• Developed an AI-powered chatbot using ReactJS and Python.

• Integrated LLMs for natural language understanding and response generation.

• Used LangChain for task chaining and conversational memory.

• Implemented document and website data extraction (URLs & sitemaps).

• Applied text chunking techniques to improve AI response accuracy.

***Technologies*:** ReactJS, Python, LangChain, LLMs, NLP, HTML, JavaScript, GitHub

EDUCATION

Bachelor's Degree in Computer System Engineering — Arab American University (Jenin, Palestine)
October 2019 – February 2025

LANGUAGES

• Arabic: Native

• English: Intermediate (B1 Level)

SOFT SKILLS

• Strong communication and teamwork skills

• Excellent time management and organizational abilities

• High self-motivation and willingness to learn

• Problem-solving mindset
